FOREWORD

Norton & Brooksbank together with the Reed family look forward to welcoming you all to Cardiganshire on the 20th October for the dispersal sale of the entire RHOS herd of Ayrshires. This sale presents a genuine chance to purchase Ayrshire cattle, seldom seen offered in these abundant numbers. Over three hundred head will sell (along with dairy equipment), giving a rare opportunity to both commercial producers looking for hard working, profitable cows or Ayrshire breeders looking for special individuals with top pedigrees.

Phillip & Lorenza Reed are well known throughout the local farming community, with Phillip previously having been a dealer and trader of large numbers of beef cattle & stores. During the last Foot & Mouth outbreak however, trading cattle became impossible in the main and so the decision was taken to change direction and begin dairying with Ayrshires being their breed of choice. In 2004 the Reed's purchased locally the good Gupton herd as a foundation together with numerous members of good cow families from top herds the likes of Haydale, Barr, Sandyford & Haresfoot, In 2007 the opportunity was taken to purchase the WINDSOR herd of Ayrshires from our late Majesty's Royal Farms with many of the cattle catalogued being descendants of the Queen's herd.

Over recent years the herd has been developed using top sires and modern genetics and has now become a highly regarded herd in the Ayrshire breed with Phillip having previously served on the Ayrshire Society Council as well as the family being keen supporters of shows and breed events with many show ring accolades. Testimony to this is that the herd currently contains a large proportion classified VG & EX with many of the younger cows destined for the same, in time.

Today, Phillip & Lorenza farm alongside their two sons Steffan & Shaun together with outside help from their daughter Rebecca. Together with the dairy herd the family also farm considerable beef and sheep numbers and it is this enterprise which Steffan & Shaun wish to continue to expand and concentrate on in the future and therefore the decision has been taken to disperse the dairy herd in its entirety. The family would like to thank all staff, past and present together with all friends and family for their hard work, loyalty & support in their farming journey over the years.

MANAGEMENT & HEALTH STATUS

The herd is run on a strictly commercial basis with the emphasis on profitable milk production from grass & forage. The herd is all year round calving, housed in cubicles and milked twice daily through a herringbone. The cows are grazed during the Summer months and fed a simple grass/maize TMR with parlour top up. Current milk yields amount to 7900kg of milk sold annually and averaging an impressive 4.64 fat 3.65 protein with rolling SCC 120.

- The herd is fully vaccinated for Lepto, BVD & IBR.
- All cows receive Trace-Sure bolus, wormer and Rotavac at dry off.
- The RHOS herd has been regularly tested for Johnes through a disease monitoring program, there has never been a positive case found in the herd.
- The entire herd passed a clear TB test on the 3rd October (jabbed 30th Sept'). It should be noted that this is a low prevalence herd having not had any TB for many years.
- All animals are export tested and available for immediate export to Northern Ireland.
