# Welcome...

2021/22 President Steve Bailey

I ended my last report with the wish for a good milk price, well obviously some time wishes do come true and as we head for spring, prices are rising as processors try to maintain volumes.

Costs however are increasing rapidly so this extra money is more than justified. COVID has had a devastating impact on events, but we are now told we are past the worst and must learn to live with it as we go about our daily lives, and everyone can have a Boris party or two!

In mid-November, breed heritage was invited to a classification workshop in Devon by kind permission of the Cornish family, there was not much variation in the scores, but as a breed, we need to give more information on milking speed and temperament, so bull proofs are more accurate.

The Whiteford family held a highly successful sale of Ayrshires and Red and Whites from their Middle herd. Trade was extremely good with the 194 female lots averaging over £2000. The sale was topped at 3500gns by Middle Mary MP finding a new home in Lancashire with the Jamara herd.

One show that did go ahead was the Ulster Winter Fair. As usual the hospitality was great, and we had a steady stream of visitors to our stand. A full report on the results can be found later in this journal.

At the beginning of February, it is always great to open the post and get a few phone calls because it is my birthday. As you get older, I am sure the cards get ruder and the presents less exciting. What I was not expecting was a call from Alan to say he was resigning. We have all enjoyed Alan's commitment to the Ayrshire breed and his willingness to get around the country visiting so many members both old and new. The presidents would like to thank him for all his hard work and wish him well for the future.

By the time the journal reaches you I will have been to Yorkshire for the young breeder's weekend, both myself and past president Michael Howie will be there to help where needed. I am certain there will be a lot of learning and laughter for all the young breeders that are in attendance.

My own conference in May is all going reasonably to plan, and we have been very lucky to have such great sponsors and a wonderful hotel to work with. We hope to see you all there and look forward to spoiling you with some Cheshire hospitality.

to the 2022 Spring edition of the  
Ayrshire Journal.

# THE COUNTDOWN IS ON

The World Federation Committee have held several online meetings and have engaged at a local level with members in areas where the route will go through. All the farm visits have been agreed with the final route being drafted. The conference will start in central London on 30th June 2024 and finish in Belfast on 18th July 2024.

The conference will have its own event website which is currently being put together along with a promotional film and branding. The launch of the conference will tie in with the website and film where we will announce more about the route and a booking form with a staged payment plan for those wishing to spread the delegate fee. All hotels chosen for the conference will have been visited by a member of the committee prior to the booking form release, giving us confidence in the quality of hotels we have selected.

We are also working hard on producing a local sponsor package tailored to what we can offer potential supporters in the different areas and will be shortly contacting all farm hosts to provide help and support with the hope of gaining sponsorship for costs associated with holding a farm visit. We will also collaborate with other supporters on general sponsorship of the event and are delighted to announce that we have our first sponsor on board. Cattle Services (AYR) Ltd have donated £2,000.00 to start their sponsorship package which will reach £10,000.00 by 2024, making them one of the platinum sponsor partners for the event. This is a brilliant start to the funds and the committee would like to thank them for this commitment.

The committee are also looking at other funding opportunities and if anyone is aware of any local grants available or if you have suggestions of companies that you think would like to be involved then please contact the office as we have lots of ways in which we can support requests with template letters and tailored packages.

There is a real buzz and excitement around the whole event and once we have launched in June, we will be following up with our World Federation member countries at the mid term meeting during World Dairy Expo where we will present details on the wonderful farm visits and the scenic highlights that the route will give to delegates.

We have a brand  
The route is planned  
The quality of cows is sure to delight  
The activities planned will definitely excite  
Watch out soon  
For the 30th of June.....

## HQ CATCH-UP

General Manager Claire Kimm updates members on the activities at Headquarters

### OFFICE NEWS

Welcome to the Spring journal, we have included more articles that feature our members which we hope you enjoy and find interesting. We are always on the lookout for innovative ideas and features so please contact me or Amy with suggestions. We are very keen to make the journal more about our members to ensure you feel you are getting an enjoyable read as one of the benefits

of your membership. On the subject of membership, a decision was passed at the recent council meeting to increase the adult annual membership fee to £60 as of 01.01.2023. Members of the council felt this was still giving excellent value across all aspects of your membership including registrations, DNA's etc – especially when compared to other breeds.

During the council meeting, good discussions were held across many subjects, and on day two of the meeting we had an interesting presentation from Marco Winters, Head of Animal Genetics at AHDB, which included a review of the latest trends and an update on the type merit formula. If anyone wishes to view the presentation, please contact your council member or the office and we can email you a copy.

Also, during the meeting proposals were discussed on a repair programme for the stonework to the entrance and some of the windows at the property owned by the Society at Racecourse Road. Further quotes are now needed for a comparison and a supplier along with schedule of work will be agreed by the Presidents committee.

The office has been super busy with meetings and plenty of planning for our forthcoming events, we have also been pulling information together for the accountants to produce the annual accounts for both the Society and Cattle Services, the Society accounts were signed off by the council and are included within the annual report. Also in the annual report is a brief summary of the investments held by the Society and I receive a quarterly summary report from the investment management company Smith & Williamson. I thought it may be interesting to our members to show some of the detail for the activity within the investments during 2021 and have included these on the next page. If you have any questions or would like to know more about the investments, then please contact me.

For those of you that pay attention to detail you will notice the membership numbers have gone down significantly from the last journal. This is due to a clean-up exercise carried out by Amy in particular on the junior free members and juniors that should now be paying an adult membership. This has given us a more accurate number of members and now that restrictions are being lifted and we can attend shows, we will strive to have a steady monthly increase of members. If you sell animals privately or at a market,

please pass on the office details to buyers or if they do not mind then pass buyer details to the office and we will do our best to sell the benefits of becoming a member and hopefully sign them up.

By the time you are reading this journal I will have attended my first full young breeders' weekend which is quite funny considering on my birthday in March I was forty something.....I am attending to help with organisation and scoring for the Hugh Stevenson award. With the numbers we have booked in and the fantastic hosts and helpers I am sure in the next journal I will be telling you what a brilliant event it was!

Finally, myself and Amy wish Alan all the best for his future.

As the presidents committee work on recruiting for the vacancy, please be rest assured that along with assistance from the Presidents, Amy and I will do our very best to help you so please do not hesitate to contact us at the office.

# SOCIETY INVESTMENTS

The Society hold investments across three funds, Breed Heritage, Ayrshire Cattle Society and The Frank Renshaw. The portfolio is managed by Smith & Williamson Investment Management LLP. The following charts sets out the asset allocation and holdings as at the date shown and the performance of the portfolio. The asset allocation and choice of investments reflect how the portfolio meets the investment preferences and objectives. The portfolio's core objective is 'A balance between income and capital growth', over a 'Long - Over 5 years' time horizon. The chosen risk profile is 'Strategy C - Medium Risk 2.

# KEEP UP THE GOOD FIGHT

Ayrshire Breed Manager Alan Timbrell writes about his travels and offers sound advice.

## BREED MANAGER'S REPORT

With restrictions being lifted throughout the British Isles now the future for the Ayrshire Breed looks rosier but back in November Agriscot was postponed to February which was a great loss to the agricultural sector and still in February it was cancelled again because of the Covid pandemic.

On a very blustery 9th of December in Northern Ireland the last show of 2021 was the Ulster Winter Fair. Although numbers were back for different

reasons there were still good numbers forward in all classes. Our Champion came from South of the Irish border. Threemile Pretty Rocks by Kamouraska Rockstar, exhibited by Christian & Sinead Keenan & family who was first in the Senior cow class, with Kirkinriola CA Margie by Cottown Aftershock placed 2nd in the Senior cow class and was Reserve Champion exhibited by Martin & Jacqueline King & Family. Honourable Mention went to the very stylish yearling heifer Slatabogie Hector Alice who was also Junior Champion Ayrshire. She is by Biddesden Hector and owned by Alan & William Paul, Slatabogie Ayrshires. It was fantastic to catch up with many breeders and have enquires from potential new ones. There are some outstanding cows in Northern Ireland that I've seen in the last twelve months and urge breeders from the mainland to take a trip there to see what they have to offer.

The upcoming Royal Highland show has adopted the Ayrshire Cattle Society rules for the Red & White section. All animals that will be shown in these classes will have to have a registration code 14 and no 01 registration animals will be eligible for the classes. So, I feel this will be a major step forward for the Ayrshire Red & White section.

There has been a new deal set with Cogent Breeding for the cost of Genomic sampling and for a straightforward genomic test with an AMC test included, it will cost you £26, but if you need a parentage test included the cost will be £29.

I encourage all breeders to test their animals if they are 75% pure and above to help build the reference population so the breed can make greater gains in genetic improvement.

I urge all Society Members to keep up their registrations especially when herds are approaching a TB test. The difference in compensation is roughly 50% more if the animal is a full pedigree 03 registration animal. If you need help with this, please contact Amy in the office or email her on [registrations@ayrshirescs.org](mailto:registrations@ayrshirescs.org)

I have visited many great herds of cows in 2021 and found some real gems amongst them. Many of them 100% Ayrshire and a true type that we should be proud of. I encourage you all to breed your cows pure because I feel the Ayrshire cow has a great future in the British dairy sector with more emphasis being put on animal welfare and cows grazing nutritious grass. I feel the consumer will require animals to be able to walk freely in fields for at least 180 days a year especially after the Panorama program aired in mid-February.

**“There are some outstanding cows in Northern Ireland and urge breeders to see for themselves!”**

In late June the Carnell herd of the Templeton family is going to be dispersed at Borderway Market, Carlisle and I had the pleasure in seeing this outstanding herd in late December. The milking herd looked great but the standout for me was the superb youngstock, well grown beautiful dairy heifers a real credit to the family. This sale should be attended by all.

It is with a heavy heart that I write this final Breed Manager report for the Members of the Ayrshire Cattle Society of Great Britain & Ireland having made the hard decision to step down. I have truly enjoyed my time as your Breed Manager and wish to thank all members

for their support and hospitality shown to me and to those I didn't get to, I apologize. I hope the Ayrshire Cattle Society seizes the moment and reaches the heights I believe is attainable for this great breed of dairy cow. Upward and onwards, don't look back but strive to reach the top with the great cow, THE AYRSHIRE COW.

# BREED HERITAGE REPORT

The Breed Heritage committee has met several times over the last few months. In mid-November we met with AHDB classifiers for a classification workshop and talked to them about the way that all information is recorded such as temperament, milking speed and the likes.

Can I re-emphasize the importance of recording correct information especially on temperament as this really impacts the proof of a bull? All daughters are recorded as average unless you tell the classifier that she is good, average, or bad. The more data recorded by you the breeders, through the Breed Society or milk recording, the stronger the breed will become and its then that Breed Heritage can use those building blocks to really make a difference.

If you have high indexing animals that you feel should be looked at for future development of the breed, contact Michael Broadley the Chairman of Breed Heritage or a member of the committee listed below.

Our Breed is not a big one, so we need everyone pulling in the same direction to maximise our breed's genetic gain.

# INTERNATIONAL ASSIGNMENT

## Blaise Tomlinson, Sandyford Ayrshires

When I was asked if I would judge the National show for the South Africa Ayrshire society, the first thing that came to mind was it was a bit short notice only having 5 weeks to organise cover, we were reassured by girls they could manage without us. Deborah and I, along with Scott left for Cape Town on the 2nd of March. The show was held in Swellendam, an old Dutch settler's town 3 hours' drive from Cape Town. On arrival at the hotel, we were met by all the exhibitors

casually sat round the pool enjoying the sun and a beer or two, a much more laid-back attitude to how we are the day before a show!

Day one was the heifer show with a good standard of young stock being exhibited. The standout heifers were by Palmyra Berkely Reagan, De La Plaine B-King and Cedarcut Colata's Champion who sired the grand champion from Rhodes farming and the reserve a De La Plaine B-King daughter from Kevin Lang.

The next day was the milk cow classes again with some tremendous cows forward. The champion was a 4yr old Nexus Dreamer from Kevin Lang and reserve a Palmyra Berkely Reagan from Edmund Els. After the show we were treated to a tour of the western cape, visiting the number one vineyard in Africa, Table Mountain and the southern tip of Africa where the Atlantic and Indian oceans meet.

It really was a trip of a lifetime to see such a beautiful country and to receive such wonderful hospitality from a fantastic group of people. Special thanks to Edmund, JD, and Oleene for looking after Deborah and I. It was an honour to be invited to judge in South Africa.

## Scott Taylor, Old Mill Ayrshires

At the end of January, I got a phone call from Claire asking if I'd like to go out to South Africa to do some fitting for their national show. As I'd never clipped much more than a team of half a dozen and the thought of all the Covid palaver, going through airports seemed a bit daunting at first. After a day I decided I'd go for it - I'd kick myself if I turned it down.

Blaise, Deborah, and I flew from Heathrow to Cape Town where we were met by JD who took us right to the show. At this point, all I knew was there were 12 heifers to be 'clipped' for the show the following afternoon! Much to my relief, they had been body clipped and it was just top lines and blending body hair to do. The following day was show day, were another 8 cows needed top lining. I was very pleased to see animals that I'd been dealing with from Edmund Els, Kevin Lang and Rhodes food group all doing well in the ring with all the animals in the grand championship being ones that I'd done their top lines!

After the show, Edmund kindly took us to visit a few herds. The first stop was at Thom du Dupplis's herd where he was milking roughly 500 cows. Unlike the UK, the cows are housed outside all year round. The high yielders were milked 3 x a day on a TMR system which was trough fed in the field, the low yielders were paddock grazed but only milked twice per day. We carried on a couple kilometres down the road to the next stop where we saw Jan Wessels herd. They milk 190 cows on a TMR system. There were a lot of deep bodied milky cows in this herd with the mature cow's herd averaged over 9000litres. 7 Oaks Burdette Alaska had fairly left his mark on the herd with a large percentage being his daughters. This was an impressive herd of cows that were very uniform too.

The next day we visited the herd of Rhodes food group. Here they milked 600 cows on a fully housed 3x a day TMR system. Edmund's cows were also housed here. Palmyra Berkely Reagan had been used heavily and left his mark with a large proportion of the milking herd being his daughters. The calves were housed in individual pens for the first 30 days before being moved into hutches before moving into larger groups once a bit older with some nice daughters of champ and player amongst them.

A massive thank you to Edmund for touring us round and the rest of the South African breeders for making us feel so welcome and looking after us. It's a trip I won't forget, thoroughly enjoyed and I'm glad I had the opportunity to go on.

# SIMPLICITY KEY TO

## FARM FEATURE

A straightforward system is behind the continued and sustained success of one pedigree Ayrshire herd. We find out how it's remained the top-ranked herd, based on production, for the breed for four years in a row.

By Rachael Porter

cows on their simple system – that sees their NMR-recorded Ayrshire herd top NMR's latest Annual Production Report, ranked on weight of fat and protein, for the fourth year running.

"Topping the list isn't something we set out to do," says Laura Astley, who runs the 85-cow pedigree Sunshine herd, plus 55 followers, in partnership with her parents Phil and Jane. "It's just a happy side effect of how well we manage the cows on a day-to-day basis."

The Montgomeryshire-based Ayrshire herd is relatively new – just five years old. But the family have been dairying for more than 30 years. Phil and Jane sold the family's 140-cow pedigree Holstein herd in 2016, because Phil was unwell. And when Laura came back home to farm in 2017 the family made the decision to go back into milk, but with a different breed that they hoped would be easier to manage and better suit the farm and set up.

Ayrshires were top of the list due to their 'toughness', according to Laura, who also works as a part-time NMR milk recorder. "They're easier to manager, slightly smaller and better suited to the farm's infrastructure than the Holstein, and also offer good feet, legs and udders," she says, adding that their high milk constituents also suit their butter-making milk buyer Meadow Foods.

The mid-Wales based unit certainly sits on heavy land and Laura says the cubicle shed had become a little 'low and

tight' for the Holsteins. "These medium-sized cows better fit the buildings and facilities and they're also more suited to grazing on our land."

The all-year-round calving herd is currently averaging 8,384kg of milk, at 4.61% butterfat and 3.34% protein with a somatic cell count of 70,000 cells/ml. The top half of the herd, ranked on PTAs, PLIs and performance, are served with sexed semen to breed replacements and these calve predominantly during the summer months.

The remaining half of the herd is served to beef bulls. Cows are served with Belgian Blue sires and most heifers are put to Aberdeen Angus. Crossbred calves are sold to the Buittelar Group at around three weeks old. The Astleys have also just signed up to join the company's Longhorn scheme and will begin using semen from this traditional beef breed on heifers going forward. "The resulting calves produce meat that's leaner than other breeds and they're also extremely easy calving

sires. If there's a demand for the calves, then we thought 'why not', says Laura.

The herd is managed on a typical spring and summer grazing system at the 45-hectare unit. Milkers are turned out in May, after first-cut silage, and graze until grass growth slows – usually the middle of October.

During the winter the herd is fed a TMR comprising grass silage and 4kg of a 22% soya-free protein blend, plus minerals. This provides maintenance plus 19 litres of milk and cows are then topped up to yield in the parlour with an 18% protein concentrate. "This cake soya-free. We're trialling the concentrate in the TMR and hope to make the full switch in 2023," says Laura.

# CONTINUED SUCCESS

She says their entire herd management system as 'very basic'. "I think it's this simplicity that makes it a success. We're really not striving for high yields. Our aim is to manage a herd of healthy, fertile and happy cows, and let the milk follow."

Laura milk records monthly and also uses the milk samples for Johne's disease screening every three months. "We've had just one positive result, from a cow we bought in, and we removed her from the herd. And we've not picked up any positives for the past four years."

"We also tag-and-test for BVD and, again, results show the herd is clear of the disease. But we'll continue to test so we can monitor the herd's health status."

Transition cow management is high on the list of priorities, as Laura says it is key to a successful lactation and good fertility. "We put in extra effort here, with dry cows fed a 24% protein pre-calver roll for three weeks prior to calving. If we can promote easy calving then cows get off to the best possible start. We want them fit and ready to join the milking herd."

The difference between the Holsteins and the Ayrshires here is notable. "The Ayrshires just seem to have a bit more fight in them – they're more resilient and transition more easily. We have very few post-calving issues now. We've seen just one LDA in the herd during the past five years and retained cleansings and other issues are also few and far between. We had far more problems with the Holsteins."

The same close attention to detail is paid to newborn calves to ensure all receive the required three litres of top-quality colostrum at birth and are colostrum fed for the next three days, before moving to a 24.5% protein skimmed milk powder-based CMR plus ad-lib 18% starter feed, straw and fresh water.

"They're gradually weaned at eight weeks old, onto a 21% protein calf nut until they're eight months old. And they're then transitioned onto a mixture of hay and grass silage. The target age at first calving is 24 months old," adds Laura.

## • KEY FARM FACTS

- Owners: Phil, Jane and Laura Astley
- Herd size: 85 cows plus 55 followers
- Unit size: 45 hectares (25 owned and 20 rented)
- Average yield: 8,384kg of milk, at 4.61% butterfat and 3.34%

Having built the herd up using home-bred replacements from the original group of 24 bought-in cows from two Scotland-based units, as well as a handful of other bought-in cattle, Laura says they have no further plans to expand. "But we can see yields increasing further because we've added a high proportion of heifers during the past three years. And some of the second- and third-lactation home-bred Sunshine cows are really flying now. We're excited to see how well they perform once they start to mature."

The future will simply be focused on honing current management, continuing to review and make small improvements, and building on the herd's current success. "We can't rest on our laurels, but we don't want to push the cows or the system too hard when it's working so well. Milking Ayrshires has removed a lot of the stress we'd previously associated with managing a dairy herd. I know I'm enjoying myself and I think the breed – and our success – makes all the difference."

# RECORD SOLIDS REVEALED IN NMR'S LATEST PRODUCTION REPORT

The drive to increase fat and protein production in UK dairy herds is reflected in NMR's latest Annual Production Report, published in January 2022, for the year ending September 2021.

The Ayrshire breed has had a significant 12-month improvement in milk solids, which has added 11kg in the 12-month period to reach an average of 536kg. Along with the British Friesians, the Ayrshires have the lowest

somatic cell count average, both recording an average of 163,000 cells/ml.

## Staying power in other breeds

For the fourth consecutive year, PA & JM Astley, Sunshine Ayrshires, from Montgomery, are in first place in the Ayrshire ranking. Laura runs the 64-cow herd with the help of her parents who achieved 665kg of fat and protein and 8,384kg of milk on twice-a-day milking.

HUNTER DAIRY  
CONSULTING

## BESPOKE BREEDING PROGRAMME

We will analyse every animal on its pedigree, classification, health traits, milk yield and components taking into consideration the farm system and milk contract to recommend the next generation of breeding for all breeding animals.

### We also consider:

- Levels of Inbreeding
- AM (Curly calf) Recessive genes avoidance
- Fertility
- Sexed, conventional and beef semen allocation
- Breeding a bull from your best female lines

This is an affordable and beneficial service to increase genetic potential within your herd, by our consultant with over 35 years of success within the Ayrshire breed. Other consulting services are available.

# IT'S A TOPSY-TURVY WORLD SOMETIMES!

Northumbrian member, Richard Baynes gives us an insight on the current affairs at Marleycote.

G G Baynes & Son, Marleycote Walls, Slaley, Northumberland  
Milking 108 cows – 27 litres/day – 3.1 visits  
2 Lely A3 Robots which have now been in use for 12 years  
Silage & Wholecrop in winter  
Grass & buffer fed silage in summer

When Amy asked me if I would do a diary/blog piece for the journal I wasn't at all sure how keen I was to do it, but, as Jake will confirm, she normally gets her way, and this was no exception!

Robert Stevenson purchased an old cow back from J. Brown Catcraig from his old Mirabel family, 9 calves and 93 points. She responded well and the resulting 5 eggs x Harperfield Sands of Time have given us 3 pregnancies. She then gave 7 x Bankend Lord Ontario which are yet to be implanted. We also took a chance on the old Barr Sandy Rose 72 EX92 cow, she is carrying her 10th calf, but we were assured that IVF was a perfectly safe procedure in early pregnancy. She gave us 5 eggs x Harperfield Sands of Time.

I will start with a bit about our bottling shed, as without that, the Marleycote herd would not have survived the lean times of the poor milk price. Currently, my brother Paul is back doing all the processing as the lad we have employed for over 12 years to do the night shift decided he fancied a more normal working week – finding a replacement seems to be near impossible. At the moment there is about 9,000 litres a week going into bottles, and this will gradually increase as we move towards summer and our 150+ customers look forward to the tourist season getting back into full swing.

On the farm, Lewis and I are just about finished hedge planting for the Mid-Tier Scheme we entered – it has been a mammoth task, there is 2,700 metres of hedging plants in the ground at 6-7 plants a metre! It is fair to say that we are in no rush to do it again and we still have another 2,100 metres of stock fence to put up! We are trying to do it all in-house, if possible, but we will see how the year goes (and how my back holds up).

There is always a steady stream of calves to keep the milk flowing for the bottling shed. The pick of the pens are the Marleycote Legend calves. Long, square calves with plenty of style and he is a plus for milk. Other highlights include three heifer calves off 3 West Mossiel cows from the Mayflower, Quality & Nora families – always nice to start new lines.

This year we have tried IVF for the first time using Paragon E.T.

In other calf news, my eldest son Tom is a chip off the old block and cow mad, so his Christmas present this year was 3 Ayrshire calves sourced from Kev Tinker at Parkhead. They are all Dec/Jan calves, still on milk for him to rear and hopefully show in the summer, so we will see how Doris, Brenda and Sweet Pat come on – so far so good! His little brother Rory, not to be out done, has gone into breeding call ducks to make his fortune.

As with a lot of dairy farmers we patiently (or more often than not, impatiently) wait for slurry contractors to empty the tanks onto silage ground, this year however, full slurry stores can only be a good thing given the price of fertiliser!

As I write, Borderway UK Dairy Expo prep is well underway with 7 animals to get ready. Expo, UK Dairy Day and Agriscot are easily the best shows to attend as they are run by people who understand how much work it takes to bring cattle out, both at the show itself and at home. Unfortunately, a lot of the traditional agricultural shows, run by bowler hats, seem to increasingly think we should be grateful to be able to attend their event. This attitude, in my opinion, led to the demise of the Royal Show – my dad once commented that it would be cheaper to send us all to Ibiza for a week than to go to the GYS! In today's world we must pick and choose where we spend our hard-earned cash – the specialist dairy shows will always come out on top.

# Beeline

The Bailey family have farmed in Audlem, right on the Cheshire, Shropshire border in the very south of the county since 1973 when they moved from the Staffordshire moorlands. Steve and Rach bought the farm from Steve's parents in 1997 and son, Rob is now a partner in the business. Their daughter Amanda lives on the Wirral with Mark and their new-born daughter Tigerlily, Amanda works in Liverpool where she is a partner in a law firm.

The farm was originally 160 acres when Steve joined the business, and over the years, land has been added with the family now farming over 500 acres with 316 owned and the rest on either short-term rentals or maize grown on contract. Crops grown are grass, maize, and whole crop wheat. Lucerne has been tried in the past but was found to hate a long wet British winter.

Originally a black and white flying herd crossed with a beef bull with a small herd of Simmental and Charolais kept alongside, the farm policy had to change with the risk from TB rising as it crept up the country. So, a switch to breeding heifers for the herd had to begin but which breed? The Holstein was the obvious choice but had become less robust, therefore a variety of breeds were purchased to try. After some time, it was plain to see the Ayrshire and blended Ayrshire was the way to go.

So, in 2009 the Beeline pedigree herd was established, and Ayrshires were purchased from dispersal sales and privately from leading herds. The herd numbers keep on growing and are now up to 350 in the milking herd which are out to grass as much as the weather allows and on two tonnes of purchased feed produce 8000 litres which is sold to the Co-op through Mullers (since August 2020) All the cows are bred using DIY AI with only sexed semen and either Aberdeen Angus or British Blue used. The breeding policy is to produce a long-lasting high type, productive cow that can compete with any breed in either the show or sale ring. The Ayrshires used at the moment are Beechmount Magic Mike, Des Fleurs Saguenay, Palmyra Power Remsberg, Brieryside Hail, Royal Flush Sea King, and Ruisseau Clair Amarula and the Red and Whites are Robin Red, Augustus P Red, Coomboona Sme Leno, Red Impulse and Koepon Oh Ryder-Red. The proportion of beef has been increased dramatically because with the quality of the sexed product being so good now, a large surplus has built up with young stock numbers being over 400! These surplus heifers are being sold as they calve and are currently averaging over £2000 at Market Drayton.

A small amount of showing is done with the herd having won the interbreed championship at the Royal Cheshire show twice, also having champions at Shropshire, Yorkshire, and the Borderway Dairy Expo. Beeline Texas Swan 2 has also been the National British Red and White Champion twice. This is all helped by the expert work of Wendy and the team from Clipaholics. The future policy is to allow cow numbers to increase to 400 but reduce the young stock numbers to below 300. This will have a positive effect on the carbon footprint of the farm, something all milk buyers are looking at producers achieving. Solar panels or a wind turbine are also on the agenda, but it will depend on the payback time. It is also a wish to make more use of the slurry produced through better analysis and the timing of application.

The family are looking forward to the excitement but not so much the stress of members and friends inspecting the herd in May and hope the weather is kind and the cows look well.

## 2022 CONFERENCE HERD VISITS

# Booths

The Norbury family look forward to welcoming you to Booth Hall Farm, Knutsford in May. Mike is the third generation to farm at Booth Hall, with Grandfather Joe, starting the "Booths" Prefix in 1957 and Father, Alan, taking over in 1990. Alan is planning to retire this year, with Mike and his wife Rachel set to continue with the family business. Mike and Rachel have a Son, Thomas who is almost 2, and will have welcomed a new family member by the time of the conference visit in May.

Today the farm milks 200 cows. The farmed area is approximately 500 acres, 140 arable and maize and the rest to grass. The herd are housed for six months of the year and TMR fed, with concentrates fed in the parlour. In the grazing season, April to mid-October, the cows are outside full time. The herd is averaging 7800 litres at 4.5% butterfat and 3.45% protein with a calving index of 386. Our milk buyer is Muller and we are on a CO-OP aligned contract.

Cow families to look out for include Embam, Middle KJ, Charm and Shooting Star. At present mostly sexed semen is used, with British Blue on the bottom end. Service sires include Brieryside Hail, Des Fleurs Saguenay, Hilltown Oblique, Aladdin Red, Robin Red and Sheild Red. Our future plans are to increase litres from forage. We hope to focus on improving soil health and minimizing fertiliser applications, through better use of on-farm manures.

# Whitegate

Ian and Janet Patrick own the Whitegate Herd. There are 135 milking cows and 110 young stock. The herd was established in the 1920's when Ian's grandparents came to England from Scotland, but only became pedigree in the 1950's as the Garrett Hall herd. Ian's parents, Jim, and Margaret ran the farm from 1973 until they retired in 2001 when Ian and Janet took over. In 2014 the landlords got planning permission for the land at Garrett Hall and relocated the herd to Whitegate Farm. They built a new dairy set up on what was formally a free range chicken farm.

The farm has 110 acres at home and a further 150 acres away from the farm. It is a grass-based system, with silage fed down a passage with concentrates fed in the parlour. The herd is currently averaging 7200kg at 4.3bf and 3.4p, with all milk sold to Arla.

Ian's favourite cow family are the Florence's as they have many of the traditional Ayrshire traits. His favourite in the breed are the Fragy and Fragrance families at Hunnington. Current stock bulls are a son of Mawdesley Bright Beam out of the Barr Trixie family and a Napier out of the Molly family at New Close (John Watson). Semen currently being used is Castern Tornado, Hunnington Fantasy and Auchensale Star Performer.

## 2022 CONFERENCE HERD VISITS

# Parklands

In 2018 Richard became a partner in the business with his mum Hazel after making the decision to take the former retired dairy farm back into milk production at just 22. The decision was to go down an autumn calving route as the easiest way to get started with a large number of heifers.

After working with Ayrshires for 6 years previously at Beeline for the Bailey Family, it was the obvious choice. A robust cow, which is good on her feet, excellent milk quality, fertility, and longevity. This is when 'The Parklands' Ayrshire herd was formed. 100 Ayrshire heifers were purchased from leading herds across the country to form the backbone of the breeding herd. Since then, we have tried to create a level herd through breeding, but we are only two generations in. All cows are AI'd with either dairy-sexed semen, British Blue or Angus depending on the animal and an Angus bull is used as a sweeper. Dairy bulls we are currently using include Cuthill Towers Buster, Troutbeck Progress, Ardmore Jeepers Creepers, Palmyra Power Remsberg, Augustus P Red, Robin Red, Koepon Oh Ryder-Red, Impulse Red, and KCCCK Amaretto Red.

Favourite families in the herd go back to some of the original animals purchased, which are Beeline Prime Jade, Whitegate Julie 5, and Sandyford Supreme Mayflower. Since 2018 the herd has increased to 250 head, through our own replacements but also with some purchased animals due to the prevalence of TB at the time. The current lactation average yield is 8213 litres per cow. After securing an aligned CO-OP milk contract in 2020 a new shed has been constructed with the aim of increasing numbers to 300 with animal health and welfare at the forefront with the help of our experienced herdsman Kevin.

We currently farm 400 acres mainly of grass incorporating 30 acres of winter wheat and 80 acres of maize, this makes up the bulk of the diet through the winter at around a 50:50 maize to grass silage ratio with blend and minerals added to form the TMR. As well as semi TMR and grazing through the summer months, we feed to yield through the modern 25/50 ATL parlour. Having now completed the new shed build and the parlour, we believe that the farm has a solid infrastructure that will stand us in good stead for the future.

The plan going forward is to increase production by improving pedigrees and efficiencies around the farm as well as a slight increase in cow numbers. Hopefully in the meantime our ongoing battle with TB will subside. We look forward to welcoming the Society visit in May.

A WARM WELCOME AWAITS AT

## MEET THE JUDGE

Lynn Lee, Smyrna, Tennessee, USA, is a lifelong dairy cattle breeder with a wide-ranging experience as an auctioneer, as a type evaluator for the American Jersey Cattle Association, and show judge.

His judging assignments over the past several years have included World Dairy Expo,

the All-American Dairy Show at Harrisburg, Pennsylvania, Eastern States Expo, And the Ayrshire, Guernsey and Holstein shows at the North American International Livestock Expo.

In 2007 he judged The All American Junior Jersey Show, and in 2008 the National Jug Futurity in 2010 the Western National Jersey Show. He has traveled to Colombia, Canada, Finland, Guatemala, South Africa, Australia and New Zealand to judge National shows in those countries.

Lynn and his family operate 340 acre farm and have over the years bred and owned numerous All- Americans and Reserve All-Americans bearing there Lee's Dixieland Prefix. He is also Co-owner of Tradition Auction Services which is a full service auction company selling Dairy, Beef Cattle and Farm equipment.

We look forward to welcoming Lynn to UK Dairy Day for our National show.

# CATTLE SERVICES NEWS

Cattle Services Sales & Marketing Manager, Sam Wake, keeps you up to speed with the genetic advancements made within Cattle Services

## CATTLE SERVICES NEWS

2021 saw Cattle Services have their highest sales year for the past 5 years. Within the UK market up to 60% of these sales were from SEXED ULTRA 4M straws, bulls such as Pam Ayrs Hawaiian, Biddesden Hector, Brieryside Hail, Moathouse Monopoly and Hunnington Fantasy all sold very well. It is great to see breeders benefiting from getting females from their best cow families now they can use

the product in confidence. Export sales in 2021 were very good with this trend continuing into 2022.

This spring and summer Cattle Services are excited to be releasing the following 5 sires for you to use in your breeding programs –

- Tontine Astorwell, who is a Gunnarstorp son of Tontine Ideo Welcome EX93 2E, Welcome has lactations over 11,000kg. Astorwell offers breeders the opportunity to use a 100% bull who is very different to many of today's prominent bloodlines. He will be available to the UK mainland market in conventional straws only.

- Harperfield Wind in the Willows is a Harperfield Sands of Time son of Willowfields Winnie 2 EX93 3E who has many show winning accolades to her name. Across the UK the Wind in the Willows calves impress on many farms that I have visited. He will now be available to the Worldwide market in both conventional and SEXED ULTRA 4M straws.

- Alkmonton Stardust is the next sire who will be available in SEXED ULTRA 4M and conventional straws to the Worldwide Market. Stardust offers breeders a different bloodline to use within their herds, he is a Kamouraska Bigstar son of Alkmonton Ambassador Victoria who is classified EX90 and is sired by Stamford Ambassador. Stardust also carries the A2/A2 gene.

- Another bull whose daughters impressed so many breeders last year both at home and in the show ring was Pam Ayrs Hawaiian. Hawaiian unfortunately could not get back onto an AI centre, but he has been collected for the mainland market in conventional straws. Hawaiian is a Lagace Ristourn son of Pam Ayrs Hawaii Five-0 EX93 4E with his grand dam being the amazing Pam Ayrs Dream Hawaii who was classified EX96.

- The final sire is Grove Razell who is the result of a Breed Heritage mating. Razell is a Swaites Nickle son of Grove Rosie 31 EX90. The 3rd dam of Razell is the fantastic Grove Rosie 5 who is classified EX95 8E. Razell will be available to the Worldwide Market in both SEXED ULTRA 4M and conventional straws.

For more information on these sires please keep an eye on the website, the Cattle Services Facebook page, and the text alerts. The aim at Cattle Services is to release 6 new sires a year, with this in mind a question that I get asked a lot is - What is the criteria for bull selection?

The answer to this is a lot of things that the committee must consider, firstly the health of the herd the calf is born with regards to TB, the next is the health status of the calf, IBR, BVD free. We also look at a bull's inbreeding levels and if he has any genetic disorders, this information is gathered from the calf's genomic test. Then with regards to the calf we are looking for a bull that has the potential to benefit the Ayrshire breed. This includes a good sire and dam who is bred from a great cow family that excels for longevity, type, production, and components. We are also looking for bulls that can offer breeders an outcross to today's prominent bloodlines.

Another question that I am asked a lot is what is the weighting for PLI (Profitable Lifetime Index) and what is it?

PLI indicates the extra profit that a daughter of a bull with a high PLI will make over her lifetime compared to a bull with a low PLI of £0 will make. PLI is a tool that helps you to compare your animals within the Ayrshire breed whilst promoting breeding cattle that increase production, improve health and functional type in the udder and feet and legs, increase longevity and improve fertility. Production is the main weighting within the formula making up 1/3 of the total, the other 2/3 are made up by fertility, health, efficiency, and survival traits.

The breakdown is as follows,

- Production 34.4%
- Survival 15.1%
- Fertility 15.3%
- Udder Health 13.7%
- Efficiency 11.8%
- Leg Health 8.1%
- Calving Ability 1.6%

Hopefully that gives an insight to why we look at PLI within the breed.

Finally, Cattle Services would like to thank Alan Timbrell for his contribution to Cattle Services during his time as Breed Manager and we wish him all the best in the future.

As normal please keep up to date with Cattle Services by checking the website, Facebook page and the text alerts.

Willowfields Winnie 3 EX93 3E

Beechmount Marie Girl 34

# The Story Of GROVE RAZELL

## FAMILY FOCUS

Grove Razell is the next exciting sire to be released by Cattle Services. The story of Razell getting onto stud is one of a lot of firsts.

Thomas Gordon, County Antrim, Northern Ireland and the breeder of Razell, did not start registering cattle under the Grove prefix until 2000. Before this his father registered cattle with the society

under the Ballynashee prefix but stopped before Thomas was born as he said he didn't see any benefits from being pedigree.

When Thomas decided to start the registration process again, he sent all the information to the office, Thomas's wife Sharon had one request though that one cow had to be called Grove Rosie the rest of the cows were named by the staff in the office after flowers. Over the years the Rosie family has continued to excel in the Grove herd, Thomas says "The Rosie's have all been easy to work with, the family is very good for fertility, they always have a good PI for production within the herd alongside really good solids making them the type of cow that I strive to breed".

Razell himself is the result of a Breed Heritage mating. He is bred from 5 generations of cows that are scored in the top two grades. Sired by Swaites Nickle and out of Grove Rosie 31 who recently scored EX90, 22 days fresh in her 3rd lactation. Rosie 31 is a very fertile cow having calved her 1st calf on the 24th February 2020 and her 3rd calf on the 28th December 2021. Her second lactation yield was 7,207kg at 4.93% fat and 3.33 protein. The second dam of Razell is the 60 tonne Grove Rosie 10 EX91 3E. Rosie 10 completed 8 lactations in 8 years all of which were with fats at over 5%. Razell's third dam is the most well-known cow that Grove herd has produced Grove Rosie 5. She is the still alive in the herd today at 17 years of age having completed over 80 tonnes of milk. She was the first cow to classify EX95, the first star brood cow at Grove, the first Ayrshire show champion that the family had at Ballymena Show in 2011. The next cows in his pedigree are Grove Rosie 2 who completed 8 lactations and classified VG89 then Grove Rosie who was classified VG85.

He has been genomic tested, and he carries the A2/A2 gene and has predictions of great fertility, high fat, and super management traits alongside high type. Grove Razell will be available to the Worldwide market in both SEXED ULTRA 4M and conventional straws.

Razell's 3rd Dam GROVE ROSIE 5 EX95 8E

Family member GROVE ROSIE 63

# SUPPORTING MILK FAT AT GRAZING

KAREN WRIGHT

Dr Phillip Ingram  
Cargill Ruminant Technical Manager

Nothing beats seeing cows at grass and the grazing season will be welcomed even more this year, as we face high bought-in feed costs.

But the downside of the grazing season can be a milk fat depression, particularly in spring and early summer.

Milk fat is 'under threat' when cows graze lush grass. "This happens in early spring, and also when cows graze fresh grass after a re-seed or the aftermath of first cut silage, or after nitrogen applications," says Cargill's ruminant technology manager Philip Ingram. "We also see dips in milk fat where cows graze low covers after cold spells or a drought.

In the UK, a typical milk fat seasonal pattern sees milk fat drop by 0.27% between May and November, with a maximum drop of 0.3% in July.

With most payment schemes based on milk solids, this drop in milk fat represents a significant reduction in milk income. This can be as much as 44p per cow per day, and 30p per cow per day across the season. Based on an average yield of 26.5litres a day, and a typical milk contract, this can amount to a drop in potential milk income of £4,600 for a 100-cow herd.

And where milk contracts are more extreme, this drop could be worth even more.

"The greatest risk of reduced milk fat is seen where cows are grazing young, green leafy grass," adds Dr Ingram. "This grass has lower structural fibre, so digests quicker, as well as higher sugar content, which can create acidic rumen conditions.

"And it is higher in oil than more mature, later season grass. In spring and early summer, the oil content in grass is 50% richer in unsaturated fats than a typical winter ration."

This combination of acidic conditions and a high oil content from the fresh grass that creates a 'perfect storm' in the cow's rumen. This disrupts the usual pathways used by the cow to produce milk fat and under these conditions, dietary oil is converted to conjugated linoleic acid (CLA). This is an oil that disrupts the fat production

processes and causes a depression in milk fat.

"It is possible to counter this milk fat drop by using a specialist rumen buffer like Equaliser Cream that is designed to target the causes of milk fat depression and reduce the impact of the high oil content of grass on milk fat," says Dr Ingram. "It has been shown to tackle the potential problem before it happens."

Most buffers tackle rumen pH as a means of mitigating milk fat depression, but they are not consistently effective. "And using C16 fats after the milk fat has dropped is treating the problem after it has happened."

Equaliser Cream was used in herds in Ireland and the UK in 2021, and data from 17 units where Cream was used at feed rates between 75g and 150g per cow per day in diets where grass ranged made up between zero and 70% of the diet all had positive results.

"Those feeding Cream before experiencing a butter fat drop in spring had the best results," adds Dr Ingram. "They remedied any drop and saw an average improvement in May of 0.41% butter fat.

Those adding Cream where milk fat had started to dip saw a benefit within seven days with an average uplift of 0.31% which continued over the next few weeks with an average milk fat increase across the month of 0.52%. These farms had the most dramatic experience

"The proven success of this specialised rumen buffer means that farmers can look forward to the 'pro's' of high energy and protein in spring grass, and counter the 'cons' associated with a decline in fat. And while we see little sign of high bought in feed costs abating, the attracting of increasing yield from home grown grass will look even more attractive."

# LOOKING BACK

Linda Batty looking back at the Snowhill Herd

The Snowhill Herd won the Silcock Gold Cup National Dairy Herds Competition in 1953 + 1957. It also won the Hugh Bone Cup for best Ayrshire in the National Herds Competition 5 times in succession.

After the war, showing restarted in 1946, and the herd won 958 prizes including 142 Champion or Reserve Championships, the remainder 1st, 2nd + 3rd prizes. The climax of Snowhill showing was in 1957 with the Supreme Individual Championship at the Scottish Dairy Show and 4 other awards with Snowhill Rose Bud. In the Milking Trials she established the record for the breed and secured the highest number of points over all breeds.

The Corporation Cup for the best Heifer (all breeds) was won by Snowhill Nonny. At the London Dairy Show Snowhill Nonny (6 years old) took Supreme Individual Championship and 7 other trophies.

The herd was dispersed after 30 years in 1962, and probably attracted the most interest of any Ayrshire sale in those times. 238 lots sold in 4 1/2 hours and grossed £42,000.

In 1963 the remaining 31 females and 1 bull were sold to Ross & Weir, Wheatrig.

John Bourne died in 1988 at the age of 84. Since 1951, the property has been owned by the National Trust, and the manor and gardens open to the public. The former owner, Charles Paget Wade's huge collection of artifacts is still housed in the 16th Century Country House.

Much of the information has come from a 1958 copy of "The Snowhill Herd", a booklet based on research made by Mr David W Holme, Reading, and Mr Stewart, President of the Ayrshire Cattle Herd Book Society.

## BREEDER COMMENT

After becoming a director of Bourne and Hollingsworth, London in 1925, Mr John Bourne didn't enjoy good health, and his London Physician advised "Go and live in the country and drink Ayrshire milk every day!"

He bought the 532 acre Snows Hill – a property in poor condition, without electricity and mains water. He founded the Snowhill Herd in 1932 with 4 cows from

the late Mrs W.W.Bourne, Galston, and then bought a further 26 during the following 10 years.

In time the acreage was added to, with the purchase of Smallthorns Farm in 1939, and Hornsleasow Farm in 1942, bringing the total acreage to 741 acres, plus a further rented 375 acres, some 1116 in total.

Over time farm buildings were erected including a byre for 98 cows, along with numerous staff cottages and flats with modern conveniences: telephone lines and a bore hole.

Staff included chief herdsman - Tom Gibson; farm secretary, Miss Doris Stammer; shepherd; six herd staff who had alternate weekends off, and due to the number of weeks spent showing, staff from other departments would often be recruited to assist with the milking and general chores.

Along with the famous Snowhill Herd of Ayrshires, there was a flock of 350 pure Clun Forest Ewes, a deep litter poultry unit for some 1300 layers, grain, 130 acres of woodland providing fencing materials and various crops.

One of the best Ayrshire sires of the day was Riggfoot Paymaster. No fewer than 19 sires used at Snows Hill were direct descendants of his. Other sires used were Westburn Full Bloom, Lessnessock Watchword, Sandhill Hopeful, Eglington Mains Reliable, but probably the best known, who was known as "the maker of Snows Hill", was Bargower Section Leader. He was purchased in 1942 and sired 30 daughters before being sold on.

When these daughters calved, they not only were great conformation, but also good on production to, resulting in the bull being re-bought into the herd! Section Leader went on to sire another 93 daughters, and became an Approved Sire in 1950, with great improvements in milk and fat on their dams' figures.

Conscious of the need to be rid of TB in cattle, the herd became the first to be "officially Attested" in the Government Scheme. In 1948 John Bourne became chairman of Gloucester County Milk Records and was also chairman of the English & Welsh Ayrshire Cattle Breeders Association. In 1951 he served on Ayrshire Society Council.

# MOSSGIEL MILK

## A SUSTAINABLE FUTURE

As I was growing up, the Ayrshire Journal was always the one thing that came through the post that immediately meant dad wouldn't be participating in the nightly chat at the dinner table.

As soon as I could get my school leaver forms signed I left our family farm in 2005, aiming for a career in the motor trade – as far away from the publications in the Journal as you could imagine!

When we got the news dad and papa weren't well, I was in a lower management position at Mercedes Benz and hadn't imagined a life within farming however once I took a 'holiday' to help out, I fell back in love with the farming way of life again.

Over the next few years, we lost dad and papa, the milk price collapsed forcing us to sell off the herd and most of our family legacy; then the bank withdrew funding – finding loopholes in our succession planning to take inheritance from other members of the family too.

We were hit hard by this, but we still had our farm tenancy and 28 Ayrshire/Red Holstein cows. Concentrate feeding that had been the cornerstone of our 3 then 4 times per day milkings, to gain huge levels of milk production, were inaccessible due to cashflow and fertiliser payments became impossible too – but we knew the power of the Ayrshire; famed for her ability to turn questionable quality grass into incredible, nutritious, and delicious milk. The big dairies weren't interested in 'black and white milk' as they called it...but we had different ideas.

Mossgiel Milk was launched. We brewed the Mossgiel girl's milk as slowly and at as low a temperature as we could, to amplify the incredible flavour.

We became organic a few years later then Pasture for Life accredited after that (100% grass fed) which gave further challenges themselves, particularly maintaining cow condition; but the Ayrshire left in them shone through whilst we adjusted to this new level of herd management.

We identified that growing heifer calves was a particular challenge, with no concentrate feeding to continue growth after milk – we had

to think outside the box. This led to the adoption of a 'cow with calf' system where we leave heifers with the dams during daytime (8am to 5pm) then separate at night so the dam builds enough milk for her to be milked the next morning on a once per day milking system.

The most obvious thing you will be thinking is 'what about all that milk you've lost' – I can hear dad himself screaming at me in my head that we have reduced his once extremely high yielding cows to having less than a third of their milk hitting the tank per day... but where there is change there is growth!

The system allows us to have incredibly low costs of production and due to the support from our customers we are able to achieve a premium for the milk. Our bull calves grow extremely well on the system too so leave us at 7-12 months for an ethical rose veal butcher on the East Coast. Again, the Ayrshire breeding combined with 100% grass & milk brings a quality that is highly noticeable.

Outside the management of our own farm, today we also sell a further 1.5 million litres of bottled organic milk supplied by traditional, organic family farms in SW Scotland through the co-op, OMSCO. We have a team of 25 people at Mossgiel who work in bottling, admin, deliveries and in our own coffee shop within our local village. Mossgiel Organic Milk is supplied across the central belt of Scotland and our mission is to challenge the norm of our industry – showing there is massive value to our traditional ways of farming, that dairy CAN work with our natural environment to enhance it (unlike the misconceptions reported in the media) and that liquid milk IS a powerful superfood in ways that the consumer/public may have forgotten.

Since we ditched single use plastic in 2019 we have saved over 8 million pieces of plastic, we promote better mental

health in farming and we're pushing to be net zero by 2025 by using organic farming and renewable technology in new ways.

I have personally been both hugely supported and hugely publicly ridiculed by my peers for our approach to our system of farming and how we communicate to our supporters.

I believe that we have the eyes of the public on our industry and plant based alternatives with HUGE cash reserves are trying to undermine us all – so it is time for us to try new things and communicate, support and enhance the great work done by our dairy farmers every day; and the promotion of the breed of cow favored by thousand's across the planet can be at the very center of our future in a world of sustainable dairy.

ENTERTAINMENT • FOOD & DRINK • COUNTRYSIDE

# RUAS Winter Fair

It was great to see so many members old and new visiting the stand for a catch up in early December at the Royal Ulster Winter Fair. The show itself was a huge success and especially the new cattle shed which was so much more comfortable for the animals and exhibitors. Despite being down on numbers, the standard of Ayrshires on display for judge Mr. Edward Griffiths of Yorkshire was outstanding. Congratulations to all prize winners and exhibitors on putting on a great show of Ayrshire cattle.

- Ayrshire Champion - Threemile Pretty Rock from Christian Keenan & Family
- Ayrshire Reserve Champion - Kirkinriola CA Margie from Martin King & family
- Ayrshire Honorable Mention - Slatabogie Hector Alice from Alan & William Paul
- Ayrshire Junior Champion - Slatabogie Hector Alice from Alan & William Paul
- Ayrshire Junior Reserve Champion - Kirkinriola Famous Blossom from Martin King & family
- Slatabogie Hector Alice was also Interbreed Junior Reserve Champion.

# SHOW SUCCESS

## UK Dairy Expo 2022

It was great to see members come together at the 10th anniversary of the Borderway Dairy Expo in Carlisle. As they were celebrating 10 years of the show, the organisers asked an all-female judging panel which saw judges coming from across the USA, Canada, and UK. Katie Davidson of Halmyre was in the spotlight for the Ayrshires and here's what she had to say "I thoroughly enjoyed judging the Ayrshires at Borderway UK Dairy Expo, it was an honour to have the opportunity.

I was really pleased with the line up in the championship, I felt the young cow I tapped out as champion stood out. She was well balanced, open and dairy with a clean bone. Her exceptional mammary system gave her the advantage, she had the highest, widest rear udder with the strongest centre ligament and oozed veins throughout her silky udder.

Standing reserve was a very balanced capacious junior cow that carried a bit more condition than the champion. She was followed by a long, stylish senior cow that stood honourable mention.

The junior champion was a beautifully balanced and correct in-calf heifer, she had advantage over the reserve for her length throughout. The reserve champion was a very stylish maiden heifer with a lovely deep and open spring of rib."

3rd J Watson, High Mark

Our presentation dinner took place in the Craignelder hotel, Stranraer, all trophies, and prizes were presented, and a great night was had by all. Our spring herds competition and AGM will take place in May.

# Club News

## Derbyshire

The club hosted a well supported photographic competition night where members had sent in their farm shots beforehand for the 9 different classes. It was our first proper indoor get together and everyone came full of enthusiasm. There were 83 entries forward and our judge for the evening was Alan Timbrell, he certainly had a task on his hands. The members enjoyed listening to the reasons Alan gave on not only his placings, but all photographs entered. Results 1st Richard Harris, 2nd Linda Batty, 3rd Will Gallimore.

The club have also held their herds competition results evening. The competition was judged by David Christophers of Rosehill Ayrshires who was able to attend on the night to present the trophies. Results are as follows.

### CLASS 1 HERD ON PRODUCTION & INSPECTION - Silcock cup

W.R.C & J.E Christophers, Rosehill Premier Verylight (Rosehill Premier)

## Ayr

The Ayrshire club would like to congratulate Kevin and Alison Lawrie of Brieryside Ayrshires who married in early December.

## LP130 COWS

### WHITCROFT BELLA 30 EX94 7E LP100 1\*- M/s J D & B F Broadley & Sons

Whitcroft Bella 30 EX94 7E LP100 1 Star Brood Cow has been a very consistent production cow with her highest yield being 10,378 at 4.28%bf and 3.3%p in 305 days in her 5th lactation. In her lifetime she has completed 15 lactations and had 9 daughters and one of her granddaughters Whitcroft Bella 32 EX92 4E by Whitcroft Jacob has completed her LP100 award in 11 lactations. This high producing family will be sure to have more LP100 cows in the future.

## LP100 COWS

### COTTOWN AMELIA 4 VG86 LP100 – JOHN DRUMMOND & FAMILY

Her Dam is Cottown Amelia 2 EX91 4E who is a 2 Star brood cow, and her sire is Craigtown Stardust. She has achieved her LP100 award in 11 Lactations and has produced three VG daughters and one EX son. Her son Cottown Aftershock EX90 was the Sire of the Reserve Ayrshire Champion at the 2021 Royal Ulster Winter Fair, Kirkinriola CA Margie VG88.

### MOORLAND JAPONICA 2 EX92 6E LP100 – COURTNEY WALTERS

Moorland Japonica 2 EX92 6E by Lyner Blue Benji is owned by Courtney Walters and bred by his son Arthur Walters. Japonica 2 has completed her LP100 in 14 lactations and only lost 6 months having calved in August as a heifer and calving her 14th in February 2021. This is a great achievement which in real terms gives her a 378-day calving interval for her production life. She has bred 8 daughters with the highest classified daughter being Lyner Japonica 10 VG85 by Lyner Oblique Gruffalo.

### HUNNINGTON FRAGY 12 EX97 8E – L&C WINDOW

Hunnington Fragy 12 EX97 8E by Hunnington BBK Easlad, owned by L & C Window. Fragy 12 has completed her LP100 in 10 Lactations. Her highest yield, in her 9th lactation, she reached 10,333 at 3.51bf and 3.02P in 305 days. In her time, Fragy 12 has had four daughters, including Fragy 16 EX96 5E and three sons, Hunnington Flash EX92, Hunnington Famous EX94 and Hunnington Fantasy. Fragy 12 is only the second ever pure Ayrshire to achieve a classification score of EX97.
